SOCIAL STUDIES ETHICAL CITIZENSHIP & DIGITAL DEFENSE (GRADES 3–5)

Defend Your Data. Protect Your Device.

A comprehensive anti-cyberbullying, digital citizenship, and safe device defense programme aligned with **Social Studies Ethical Citizenship** and the **Grade 5 Chromebook Acceptable Use Agreement**. Features the **Stop – Block – Save – Tell** protocol, **Upstander** habit training, and 6 live hands-on browser simulations.

Duration: 2 Lessons (2 Hours Each) | **Total Time:** 4 Hours

Lab Format: Web Simulators & Chromebooks | **Accreditation:** Junior Cyber Defender Licence

PRIMARY SOCIAL STUDIES CURRICULUM INTEGRATION · GRADES 3–5

Social Studies Ethical Citizenship & Digital Safety

Directly implementing the pedagogical foundation drafted by **Faryal Anwar** in *"Safe Online, Kind Online"*. This curriculum extends core citizenship values into the virtual world,

equipping primary cadets with **Help-Seeking First** confidence and **Upstander** ethical action.

🤝 Social Studies Ethical Citizenship | ⚖️ Rights & Responsibilities | 🛡️ Upstander vs. Bystander | 🛑 Stop – Block – Save – Tell | 💻 Grade 5 Chromebook AUA | 📜 PECA 2016 Cyber Law | 📞 NCCIA Helpline 1799 | 👨‍👩‍👧 Family Media Agreement

1. Rights & Responsibilities of a Citizen

In civic life, rights are balanced by duties. Online, children have the **Right to be safe online** in game chats, messaging groups, and video portals, matched with the direct responsibility **never to cyberbully, mock, or exclude peers**.

STRAND: CIVIC DUTY — Simulated in Lab 5

2. Rules and Laws in the Community

Communities thrive on shared rules. Students explore platform age limits (**Minimum age 13+** on mainstream apps), the school's **Acceptable Use Agreement (AUA)**, and national cyber harassment protections under **PECA 2016**.

STRAND: LEGAL LITERACY — Simulated in Lab 6

3. Respect, Tolerance & Good Manners

Translating the golden rule to keyboards. Cadets master **Netiquette**, positive collaboration in shared Google Docs, and eliminate toxic "trash-talk" in multiplayer gaming lobbies (Roblox, Minecraft).

STRAND: DIGITAL KINDNESS — Simulated in Lab 3

4. The Upstander: Active Community Member

When witnessing unkindness, silent **Bystanders** empower bullies. We train students to become active **Upstanders** who reach out privately to comfort the target, refuse to forward harmful memes, and report abuse.

STRAND: UPSTANDER ETHICS — Simulated in Lab 2

5. Media Literacy & Digital Footprint

Every click leaves a trail. Cadets learn to evaluate if messages are true before sharing, keep **Personally Identifiable Information (PII)** private, and understand that digital actions carry permanent social weight.

STRAND: DIGITAL FOOTPRINT

Simulated in Lab 4 & 5

GOLDEN BEHAVIORAL PROTOCOL

The "Stop – Block – Save – Tell" Action Plan

The universal 4-step emergency reflex taught to all Grade 3–5 students when encountering unkind, threatening, or suspicious behavior online.

STEP 01 · PAUSE

STOP

Take a deep breath and step back. **Do not reply in anger or retaliate**. Bullies look for an emotional reaction—silence denies them power.

STEP 02 · SEVER

BLOCK

Sever digital contact immediately. Mute or block the harasser on WhatsApp, game chat, Discord, or learning portals to halt further incoming messages.

STEP 03 · RECORD

SAVE

Preserve unedited evidence. Capture clean screenshots displaying sender usernames, messages, and timestamps. Never delete proof before reporting.

STEP 04 · CONFIDE

TELL

Approach a trusted adult (Teacher, Counsellor, Parent) immediately. **Zero-Punishment Guarantee:** You will never lose your device for reporting harm!

💻 Grade 5 Chromebook Acceptable Use Agreement (AUA)

Because Grade 5 students utilize school-managed Chromebooks daily, our training reinforces strict hardware and account duty of care:

- ✓ **Individual Account Security:** Log in solely with your own school email. Never share passwords or leave accounts open on shared cart devices.
- ✓ **Curriculum-Only Operations:** Treat devices as academic scientific tools. Only access authorized learning software and approved classroom websites.
- ✓ **Kind Collaboration in Docs & Slides:** Adhere to school discipline rules in comments, shared presentations, and collaborative breakout spaces.
- ✓ **Instant Screen Lock Mastery:** Always execute the `Search + L` key combo before stepping away from your workspace.

📜 Pakistan Cyber Law (PECA) & Incident Escalation

A structured, trauma-informed escalation architecture aligning internal school restorative support with federal cybercrime channels:

1. **Tier 1 · Internal Resolution (School Level):** Class Teacher & School Counsellor. Safe, confidential mediation with zero victim blame.
2. **Tier 2 · Platform Moderation:** In-app reporting, user blocking, and account safety triage on gaming and chat services.
3. **Tier 3 · Federal Legal Escalation:** For threats, blackmail, or non-consensual images under **PECA 2016**, report to the **National Cyber Crime Investigation Agency (NCCIA Helpline 1799)** or **Police Helpline 15**.
4. **Day 2 Co-Regulation:** Parents and children co-sign a customized **Family Media Agreement** establishing shared charging docks and screen-free family meal times.

INTERACTIVE HANDS-ON LAB ARENA

6 Live Animated Cyber Defense Simulations

Test real hacking defense tools directly in your browser. Complete each challenge to earn your Junior Cyber Defender credentials.

Lab 1: The Password Cracker Challenge

Lesson 1 · Concept: Password Entropy & Brute-Force Mathematics

Challenge Active

LAB OBJECTIVE

Observe how supercomputers crack common passwords in milliseconds and build an uncrackable multi-word passphrase.

THE 3-WORD PASSPHRASE RULE

Instead of `password123`, combine 3 random words with symbols and numbers: e.g., `Blue!Giraffe#Eats99Pizzas`.

ONLINE REFERENCE TOOL

Security.org: How Secure Is My Password? · Google Interland: Tower of Treasure

BRUTE-FORCE CRACKER SIMULATOR

100 BILLION GUESSES/SEC

> TEST A PASSWORD OR PASSPHRASE:

`football123`

`123456` `football123` `P@ssw0rd!`

`Blue!Giraffe#Eats99Pizzas`

```
[ATTACK MATRIX]: Testing pattern 'foot***' against 10^11 keys/sec...
Estimated pool size: 2^54 combinations.
Brute force progress: BREACH SUCCESSFUL
```

TIME TO CRACK

450 Years

SECURITY RATING

STRONG DEFENSE

PASSWORD ENTROPY BAR:

Lab 2: Phish Hunter & URL X-Ray Scanner

Lesson 1 · Concept: Social Engineering & Deceptive Hyperlinks

Challenge Active

LAB OBJECTIVE

Inspect incoming emails and chat links before clicking. Spot false urgency and typosquatted domains (e.g. `g00gle.com`).

THE CURSOR HOVER TECHNIQUE

Always place your mouse over a button without clicking to view the actual URL revealed in the bottom status bar.

Lab 3: The Secret Code Breakers

Lesson 1 · Concept: Data Encryption & Public Wi-Fi Snooping

Challenge Active

LAB OBJECTIVE

Observe how unencrypted data on open Wi-Fi can be read in plain text by hackers, and how Caesar shift encryption scrambles the message.

HTTPS & CIPHERS

The padlock icon on websites means data is converted to ciphertext using secret mathematical keys before traveling across the internet.

INTERCEPTED: "Secret Password is Star99" (UNPROTECTED PLAIN TEXT EXPOSED TO EVERYONE!)
```

Lab 4: Trojan Horse & The Fake Download Minefield

Lesson 2 · Concept: Drive-By Malware & Rogue Browser Extensions

Challenge Active

LAB OBJECTIVE

Websites offering free game mods often hide dangerous malware inside flashing download buttons. Identify the safe file source!

RULE OF THIRD-PARTY DOWNLOADS

Never install `.exe` or `.apk` files without teacher or parent permission. Official verified publishers display file signatures.

Lab 5: The OSINT Detective & Privacy Shield

Lesson 2 · Concept: Personally Identifiable Information (PII) & Digital Footprints

Challenge Active

LAB OBJECTIVE

Discover how hackers gather pieces of your identity from background details in casual photos, and learn how to redact them.

THE GOLDEN PII RULE

Never share your school crest, home address, birthday, or phone number in online games or social platforms.

ONLINE REFERENCE TOOL

Lab 6: The Two-Lock Safe Room & Chromebook Lockdown

Lesson 2 · Concept: Multi-Factor Authentication (2FA) & Session Security

Challenge Active

LAB OBJECTIVE

Simulate how Two-Factor Authentication blocks hackers even if they know your password, and practice the Chromebook instant lock shortcut (`Search + L`).

CHROMEBOOK DISCIPLINE

Never walk away from a shared school Chromebook without locking the screen or signing out completely.

CURRICULUM SCHEDULE

4-Hour Complete Training Schedule

Structured in 2 lessons (2 hours per lesson) without rigid clock times, formatted cleanly in relative minutes for flexible school timetabling.

Lesson 1: Account Defense & Passwords

2 Hours

Lesson 2: Malware & Device Hardening

2 Hours

Relative Time	Activity & Topic
0–15 min	**Social Studies Ethical Citizenship** Briefing, Civic Duty & **Upstander vs. Bystander** Mindset
15–30 min	Threat Landscape, Multiplayer Game Risks & Simulator Environment Setup
30–55 min	**Lab 1:** Password Cracker Challenge, **Entropy Rule** & 3-Word Passphrases
55–80 min	**Lab 2:** Phish Hunter, Social Engineering Scams & Fake Game Links
80–105 min	**Lab 3:** Secret Code Breakers, Ciphers & Wi-Fi Privacy Defense
105–120 min	Testing, Daily Defense Badge Assessment & Help-Seeking Q&A

Relative Time	Activity & Topic
0–15 min	The **Stop – Block – Save – Tell** Reflex Drill & Emerging Game Scams
15–40 min	**Lab 4:** Trojan Horse, Malicious Extensions & Download Minefield
40–70 min	**Lab 5:** OSINT Detective, **Personally Identifiable Information (PII)** & Digital Footprint
70–100 min	**Lab 6:** **Grade 5 Chromebook AUA** Compliance, 2FA Vault & `Search + L` Lockdown
100–115 min	Joint Parent–Cadet Co-Regulation Drill & **Family Media Agreement** Pacts
115–120 min	**Digital Citizen Licence** Presentation Ceremony & Badges

LEARNING FRAMEWORK

Final Project & Lab Deliverables

Every student leaves the 4-hour programme with concrete technical competencies and actionable defense habits.

Lab Number & Title	Main Cybersecurity Concept	Practical Output / Deliverable	National Framework / Relevance
1. Password Cracker Challenge	**Entropy**, Brute-Force Math, Credential Defense	Crack-proof 3-word passphrase formula created	Account privacy on school & personal devices
2. Phish Hunter & URL X-Ray	Social Engineering, Urgency Traps, **Upstander Ethics**	Completed URL inspection checklist & scam defense	Prevents account theft in multiplayer games & email
3. Secret Code Breakers	Symmetric Encryption, Ciphers, **Netiquette**	Encrypted/Decrypted cipher message & polite chat	Protects communications across public Wi-Fi networks
4. Fake Download Minefield	Malware, Adware, Malicious Browser Extensions	Safe download verification seal & extension audit	Protects school Chromebooks from spyware & keyloggers
5. OSINT Detective & Privacy	**Personally Identifiable Information (PII)** & Footprint	Redacted public profile & privacy shield	Compliance with **PECA 2016** & Child Safety Laws
6. Two-Lock Safe Room & Lockdown	MFA, **Chromebook AUA**, `Search + L` Lock	2FA drill passed, session lockdown & **Stop-Block-Save-Tell**	Direct escalation to **NCCIA Helpline 1799** & Police 15

CS Technologies · CyberGuard

A flagship STEM cybersecurity training programme preparing primary students (Grades 3–5 / Ages 8–12) and parents to navigate the digital world safely, ethically, and securely.
